Access and the complete workspace

Follow the role branches first then use pages 2 to 4 for the detailed workflows

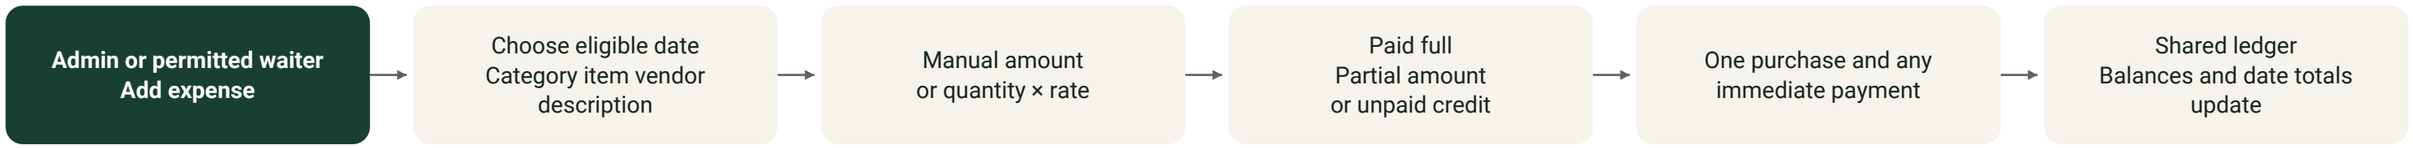

Financial records feed dashboard totals daily reconciliation credit balances salary history and reports. Administrative functions are restricted by the backend.

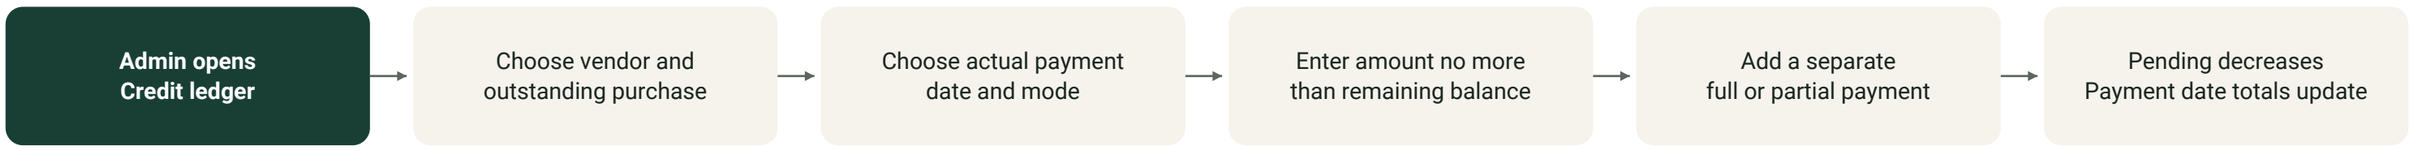

Purchases payments salaries and vendor statements

Each row is a separate workflow all financial records reuse the same underlying expense and payment ledger

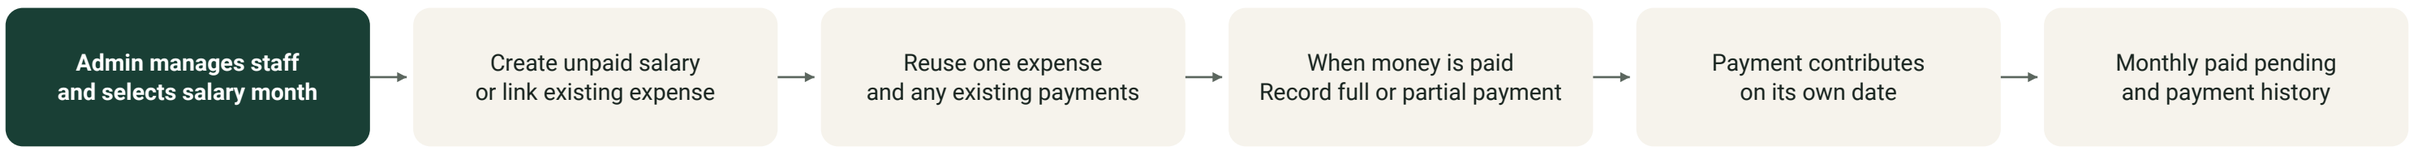

Shared expense entry

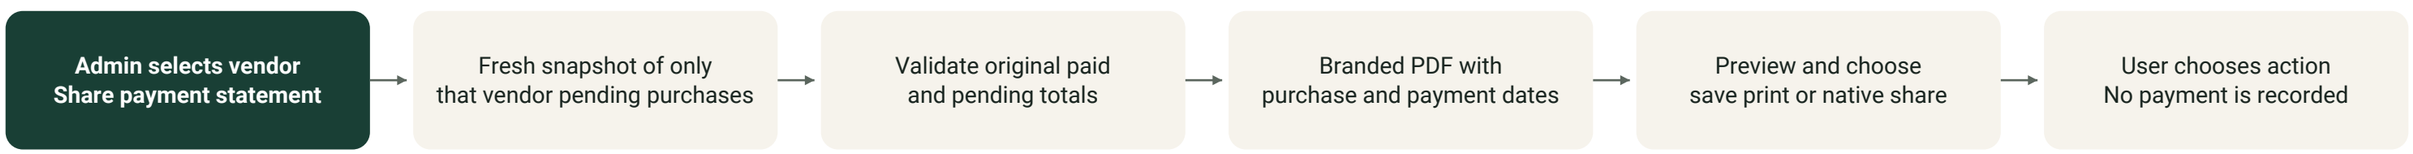

Vendor credit payment

Staff and salary payment

Vendor payment statement

Entry gate: active account + permission + server date + writable day. Payments must be positive cannot exceed the balance and cannot precede the purchase date.

Reconciliation closing and corrections

Only actual payments affect the payment date unpaid purchases and unpaid salary do not increase paid expenses

Sales and daily reconciliation

Admin enters expected sales from Petpooja → Enter net cash bank and other collections → Sum payments dated to the business date → Difference = expected − collections − paid expenses → Zero is balanced Positive short Negative excess → Review contributors Explain nonzero difference

Close reopen and close again

Review the date Sales must be entered → Close day Store closing snapshot → Date becomes locked No ordinary financial edits → If changes are needed Admin reopens with reason → Make eligible corrections Review updated accounts → Close again Prior snapshots retained

Correct or void with full history

Admin opens expense or payment history → Reopen each affected date when required → Correct expense OR void payment OR void expense → Mandatory reason Check payment limits → Recompute balances and affected date totals → Audit retains actor time and original changed values

DATE WINDOW
Calendar day 00:00 to 24:00
Previous date selectable until 00:59:59
At 01:00 ordinary grace has ended

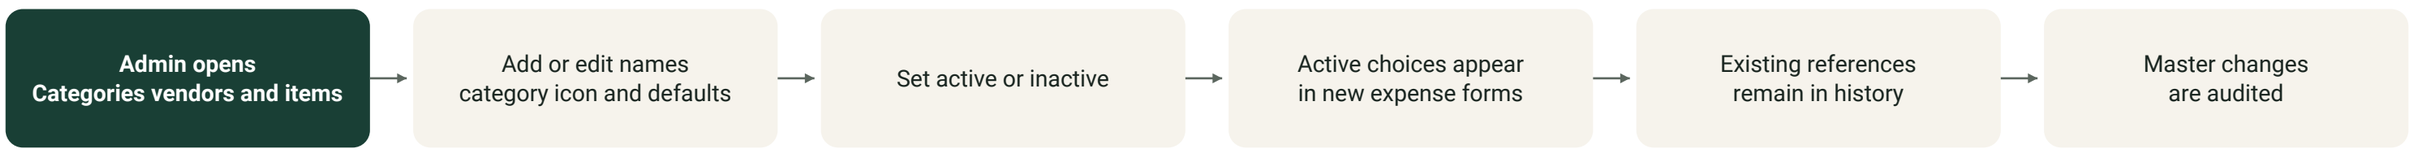

CLOSED OR HISTORICAL DATE
Admin explicitly reopens with reason
Cutoff never automatically closes a day
Waiter history remains date restricted

CORRECTION CHECKS
Amount cannot fall below active payments
Void expense after voiding its payments
Wrong date requires void and reentry

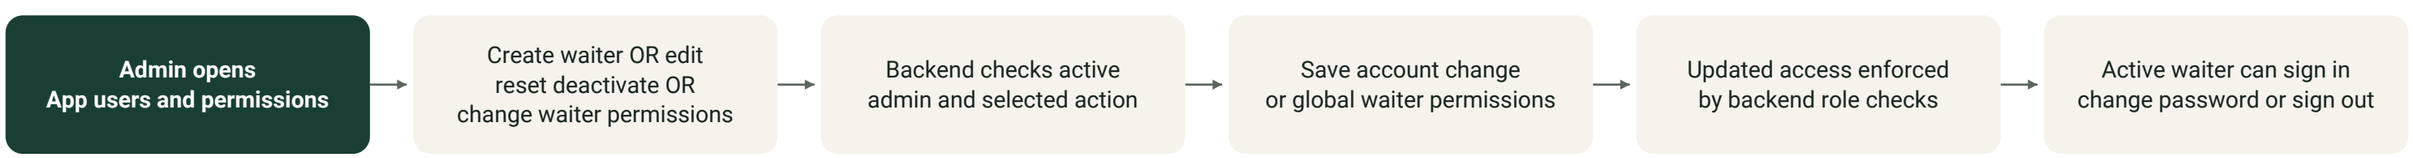

Administration reporting and recovery

Management changes preserve historical references reports preserve date meanings restore preserves users and audit history

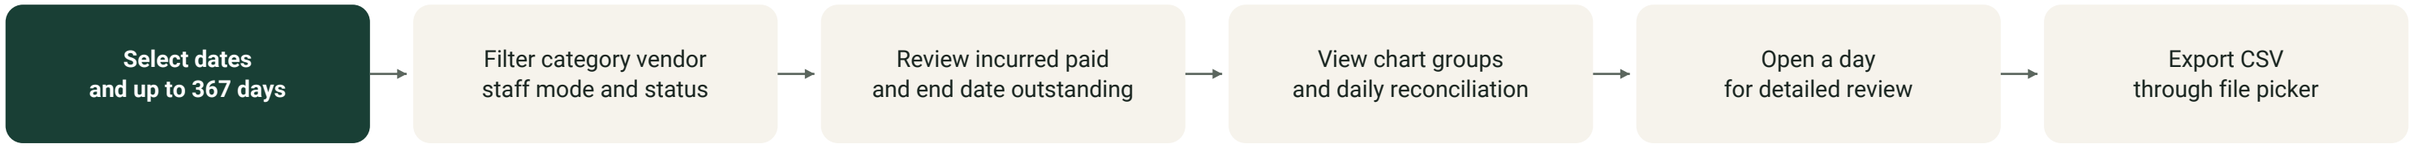

Categories items and vendors

App accounts and personal access

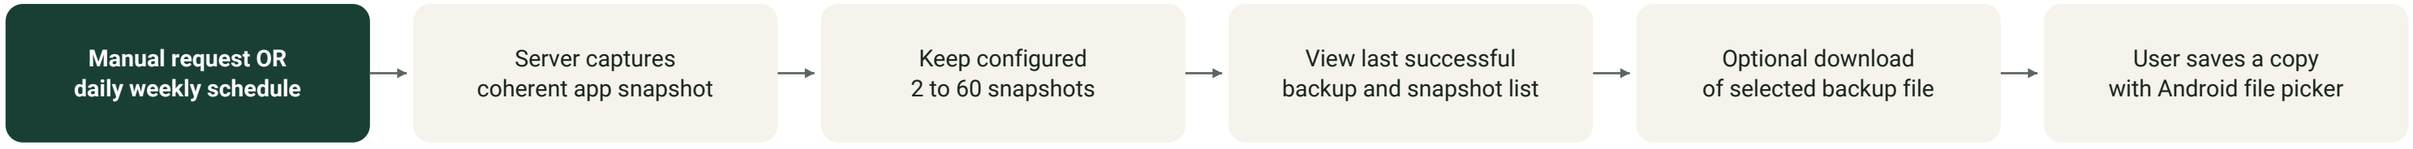

Reports and export

Expense filters do not allocate sales: sales and daily reconciliation remain complete. Outstanding uses only payments through the report end date.

Manual or automatic backup

Restore from a backup file
